

Dear Ladies & Gentlemen

By your request, with this letter we present all our service & activity.

This introduction is made especial for Developer, Architects, Engineers, County Councils, Administration, Associations and so on. (*We also offer our service & activity to private & extraordinary clients, but for these we have a own presentation.*)

We offer nearly all kind of activity, service & solution in Building & Living section.

Everything we do, offer, recommend is based on highest ethic principles of & proved quality by ***Phoenix Solutions Center***.

Today, unfortunately in building section ECO is most time a label for MORE TOXIC & poor quality!

Our planet has a problem with humans. We do not need a prophet, to know big changes happened and bigger will come. (*You are 50-60 and healthy? Or you are younger? – All big changes we will experience by our self! – And, if we don't direct this change, probably we don't like it!*)

We do NOT like paranoia, but we don't like ignorance, especial today, as well. There is always a chance. We and all our partner & friends, we see a good chance. But this is based on individual & global balance, respect & (*at least a bit*) community sense.

All our activity & service is ***Human friendly***, and based on ***fair*** business to everyone.

Because we believe, all we do for you and for our self, should be good for us truly & totally. If we take care for ***human-friendly*** honestly, without ignorance, ***we are maximum*** “eco-/environment- AND economy-friendly” ***automatically!***

But fair business is important as well. The fair paid worker today is able to be fair paying client tomorrow.

To realize this we have a big network of ***best*** partner & friends in ***all*** areas with ***same*** spirit.

We don't build best houses only! Basically ***we*** also ***help*** & ***train*** other, ***how to find solution*** & do things in the right way (= *having success*).

And ***if you can not*** get concept, material, component, technology, specialists, etc. and/or if you don't know what's good – be sure ***we can help***.

A very special thing is our ***Project Oecotop Homes of Health*** based on the very extraordinary ***Phoenix Timber Construction & HMD*** (*realising a world wide new standard*).

Since 4 years, this system is impressing tops of German specialist magazines & Irish medias. 2005, no less than ***Duncan Stewart*** presented a TV-documentation in RTE1 about the total build of one of our show-houses. 85% of all TVs in Ireland were running and RTE1 repeated it 2006 twice.

To describe everything exactly, would be too much. So we you find a good ***overview*** with ***special benefits & stand alone positions***, we think it is most important for you. Basically, with this introduction we intend to make you keen for more information.

If you like more, you will find a lot of detailed information at our webpage.

We highly recommend to read all information we offer in our “***Download***” area and in our “***Life & Health***” section.

Please enjoy information about our of ***Service & Activity*** next pages.

For more and/or individual information, please feel free to contact us directly by mail, email, fax or phone.

Pleasure & Health

Wolfgang / ***Business Manager***, (*Sale & Quality Management*)

Daniel / ***Project Manager*** (*Calculation & 2nd CEO*)

Martin / ***CEO*** (*Marketing, Invention & Expansion, etc.*)

& Team of Project Oecotop Building Systems
