

# Internal report of building-problems in Ireland

*Not only 'American Timber-Frame' in Ireland is a disaster for every customer and customers health,  
buildings out of stone are a catastrophe also!*

*These "membranes" and so called "**underslating felt**" has **NO function!** It is just certified for "**light**"-**snow!** - **NOT** for **rain!** After a couple of minutes, the water of rain is coming through.*

***This is really dangerous!**  
'**ASPERGILLUM**' is one main-source of allergies!  
**More as 90% of all new Irish houses is contaminated!***

*How much money will kids need for their health, or to get it back, to alleviate pain or to keep a sickness on low-level?*

*Do you like to wait?  
- Not necessary!*

*Every 3rd(!) children is born with at least 1 allergy.*

*There are a lot of reasons to take the "cheap" way.  
But are they really important?*

**What's money or "fun" without health?**

S o l u t i o n   i n s t e a d   o f   c o n f u s i o n !

## Timber - houses

**"American Timber-Frame?"**

**In Ireland?**

**With Irish climate?**

- "... !!!"

Page 2 of 7

## Stone - houses (concrete)

If you think, *stone-houses* will be good, you are **totally wrong**.

*Stone-houses (concrete-blocks) are also a real 'worst-case'!*

They almost **always** realize TODAY the same standard of an old Irish castle, which was build 1.000 years ago!"

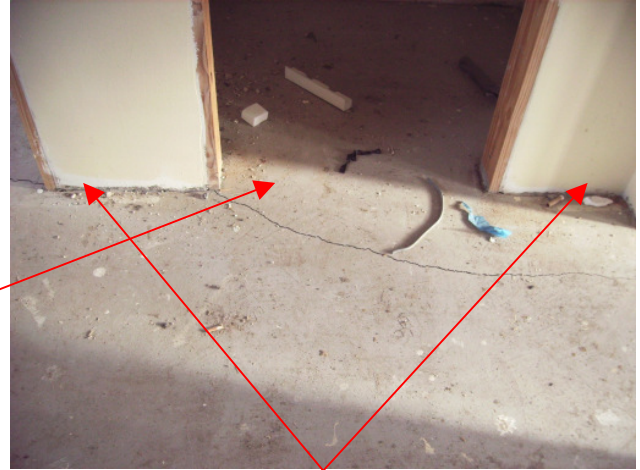

The Irish building-standard is scandalous! All basics of the physic of buildings & materials are strictly ignored/unknown. The timber & the concrete association should change their infantile dispute to a constructive & common aim. Stop pitching stones while you sit in a glasshouse. It is time to present solution instead of confusion. **'Chips & fish' & a building-standard as this, is still enough to damage the health of all Irish people for many generations!**

## Basic Mistakes

**No expansion gap from room to room!**

*(Normally there should be a 10-15mm PE-insulation-stripes between concrete-floor and wall)*

**No expansion gap to the walls!**

**“Funny”! – Some builder make the last screed before walls & roof – a wet floor for years and mould later on is no problem – they said! Auah!**

## Mould

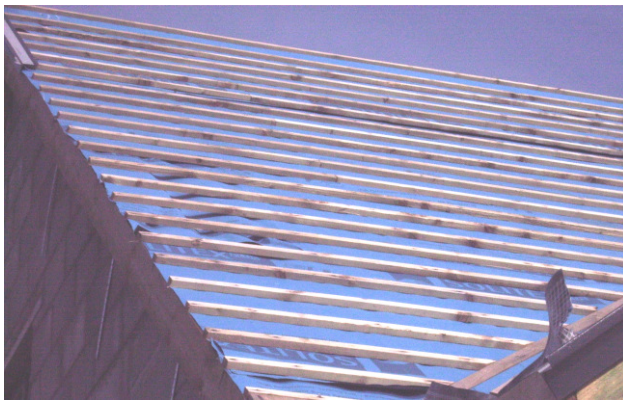

**Mould is the main source of allergies! - Everybody can get a allergy by mould!**

Instead of a good & **air-tight membrane**, there was a plastic which was **not sealed** with special tapes only. The **damp** was going through the **gaps** and **condensed** behind insulation at the **cold** surface of glue-bounded boards – and causing a lot of **mould**!

The roof is open for weeks, instead of making a **rain-tight** construction **at once**!  
 It is a job of a day – why waiting for weeks and getting mould everywhere?

At the right picture you see the typical Irish way to fix windows.

There is **NO** sealing for **air-tightness!**

**NO insulation** between frame & stone!

= cold-bridges + moisture problems by condensation

--> = MOULD!

*More examples will come!*

*We offer also workshops, seminars, training for architects, engineers, builder, constructor, private & young people.*

*If you have any question, please don't hesitate to contact us.*

## Home, Sweet Home

should mean a place of pleasure, wellness & regeneration.

- Each home has to **KEEP** peoples **HEALTH!**

The “civilized” world offer a lot of easy & “cheap” ways of “fast-fun” without any real satisfaction.

But **what’s cheap** & what’s expensive?

If you are hungry, would you spend 10,-€ for a healthy meal or do you like to save 2,-€ by choosing nice tasting “sh...”, sorry, **toxic** food?

**These kids and much more are not interested in “cheap houses” any more!**

**Neurodermitis  
Asthma  
and much more  
means pain and a  
lot of money  
to reduce pain**

**HEALTH is the most beautiful thing, a house should keep beauty and HEALTH**

- **MOULD is a main-source of allergies!**
- More than **70%** of **IRISH** houses are full of **MOULD!**
- Especial the **NEW built houses in Ireland & GB**, timber AND stone, are **full of building-mistakes**, which will cause **MOULD, pain** and more.

There is **NO** question of cheap or expensive, it is a question of good will or ignorance,  
- to understand it better: it is a decision of health or pain, life or dead!

**PAIN change peoples mind soon!**

“Where’s a will – there’s a way!”, my grandfather said. For myself I think, we don’t need terrorist or wars, because the “civilized” world is going to die out by its own decision.

But don’t forget: **pain will cause costs** too!

We believe, it is better to spend money for a house of health & a real sweet home, then spending money to reduce sickness & pain!
